

**School-Lam 27" Roller Laminator**

Put the fun back into laminating with the School Lam SL27 laminator. Easy-to-use controls give the user the flexibility to handle many types of laminating projects without complicated displays and multiple buttons. Laminating is the proven way to enhance images, sharpen colors, and protect documents from water, dirt, handling, wrinkling, and tearing.

**Standard Features:**

- Easy-to-use two switch operation
- Fixed speed with reverse
- Accepts laminating film up to 3.0 Mil
- Hand-held slit conveniently stores on the machine
- Adjustable temperature control
- Adjustable feedguide assures exact lamination
- 1" Mandrels standard
- Safety shield prevents accidental contact with heated areas of machine
- Keyswitch prevents unauthorized use of the laminator

27" ROLLER  
LAMINATOR**

**LPE6510/LPE3510  
LAMINATORS**

**LPE6510/LPE3510 Roller Laminators**

Fujipla laminators have been specifically designed to eliminate the problems and confusion of operation. A special Separation Lever keeps pressure rollers from being damaged during extended down time and allows for easier film threading. This feature also makes it easier to free the film from the rollers in the event of a wrap-around. Ultra fast warm-up time means less waiting, while up front temperature control ensures optimum adhesion. Reverse switch helps prevent jams and facilitates roller clearing. The LPE6510 and LPE3510 laminator series accepts a 1" core and processes films up to 3 mil.

**Laminating Widths:**

LPE6510: 25"

LPE3510: 13"
